2023 - 2027 KADIR HAS UNIVERSITY
B.Sc. in Computer Engineering, 50% Scholarship
2022 - 2023 KADIR HAS UNIVERSITY
English Preparatory Program
2018 - 2022 ÇİĞLİ SCIENCE HIGH SCHOOL
GPA: 93.4/100

July 26– Sep 26 KOÇSISTEM: DIJİTAL VE TEKNOLOJİ ÇÖZÜMLERİ ISTANBUL, TURKEY
Technology company specializing in enterprise digital transformation, IT infrastructure, and software solutions, serving large-scale corporate clients across Turkey.
Product & Software Development Intern

- Built a full-stack web application using React, TypeScript and ASP.NET Core (C#) that allows company employees to discover, request, and manage internal IT solutions
- Integrated Microsoft Entra ID for secure login and implemented role-based access so that different users (Employee, Solution Owner, Admin) could only access features relevant to their role
- Designed and managed a relational database with SQL Server and Entity Framework Core, modeling 22 tables and ensuring the database structure stayed in sync with the application at all times
- Wrote tests throughout development using Test-Driven Development (TDD), achieving a 204/204 passing test suite, and set up automated quality checks that ran before every code push

Feb 26 – Jun 26 EXTRA360 TECHNOLOGY SOLUTIONS ISTANBUL, TURKEY
Technology company specializing in loyalty, payment, and customer intelligence platforms, serving businesses across multiple industries worldwide.
Quality Assurance Intern

- Executed manual test cases for web and mobile applications, identifying and documenting software defects through structured bug reports
- Collaborated with development teams to validate bug fixes and ensure software quality throughout the testing lifecycle
- Performed functional, regression, and usability testing to improve application reliability, performance, and user experience

Jun 25 - Jul 25 SOCIAL OFFICE ISTANBUL, TURKEY
Flexible workspace provider offering virtual office, coworking, and serviced office solutions for entrepreneurs and businesses.
Information Technology Intern

- Developed basic Python applications and supported technical tasks to strengthen software development skills
- Utilized Microsoft Excel, AutoCAD, and Adobe Photoshop in operational and administrative projects

Jun 25 - Jul 25 SCA SOCIAL ISTANBUL, TURKEY
Digital communication and marketing agency providing branding, social media management, content creation, and web design solutions.
Project Management Intern

- Assisted in project planning, documentation, and coordination activities across multiple business and technology projects
- Prepared project charters, Gantt charts, and organizational documents to support project execution and progress tracking
- Contributed to projects related to artificial intelligence, IT law, and business process analysis through research and documentation activities

PROJECTS

GreenGrocer E-Commerce Management System | *JavaFX, MySQL*

- Developed a desktop-based grocery management system using Java, JavaFX, and MySQL.
- Implemented user authentication, product management, shopping cart, and order processing functionalities.
- Designed the application using MVC and DAO design patterns while integrating JDBC for database operations.
- Generated PDF invoices and barcode-based product tracking using third-party Java libraries.

Flip-Flop Based RAM Design and Simulation | *MATLAB & Simulink*

- Designed and simulated a flip-flop based RAM architecture using MATLAB Simulink.
- Implemented memory addressing, decoder, multiplexer, and seven-segment display components.
- Verified memory read/write operations and system functionality through simulation scenarios.

Data Structures & Algorithms | *C++*

- Solved algorithmic problems using C++ and implemented common data structures.
- Worked with arrays, linked lists, stacks, queues, trees, and graph algorithms.
- Improved problem-solving skills through complexity analysis and optimization techniques.

IT Solution Hub | *React, TypeScript, ASP.NET Core (C#), SQL Server*

- Built a full-stack web application where employees can browse, request, and track internal IT solutions
- Added login and role-based access using Microsoft Entra ID, so each user only sees what they are allowed to
- Wrote automated tests throughout development and maintained a fully passing test suite

TECHNICAL SKILLS

Programming Languages	C++, Java, C#, .NET
Software & Tools	Git, GitHub, MySQL, SQL Server, Wireshark, MATLAB, Simulink, AutoCAD
Concepts	Object Oriented Programming (OOP), Software Testing & Quality Assurance

LANGUAGES

Turkish (Native)	English (Upper-Intermediate / B2)
